

### Develop visions, shape the future.

For years our customers have been appreciating our comprehensive and individual consulting services in the domains CAD and EDV.

Encad Consulting, established since 1998, provides optimal CAD consulting services and acts as an IT-system house in a range of different industrial fields. The enterprise has its headquarters in Augsburg.

Beside consulting in PLM-environment the enterprise has specialised in virtualizing Cax-workplaces on demand.

HDX3Dpro is an innovative solution for virtualization to meet the challenges of the growing globalization of the engineering-industry. Encad consulting designs business solutions in order to offer Cax-products via the Internet. You may soon see the results of our efforts: Your engineering-workplaces will be more flexible and mobile. Our cooperation with Sophos and AVG guarantee data-protection under highest safety standards. The conception of EDV-environments for industry and public companies has been extended systematically in the last couple of years. We offer training courses and other services in CATIA, so that customers may compete in the international market.

Our offers:

- Distribution of Dassault Systèmes (CATIA, SIMULIA, DELMIA, ENOVIA, 3DVIA)
- Training courses and consulting in-house or on site
- Hotline-support
- Hardware-solutions of Fujitsu, Dell and IGEL
- Virtualization-solutions of Citrix (XenApp, XenDesktop, Netscaler)
- Mobile Device and Application-Management (XenMobile)
- Security-solutions of Sophos and AVG

We arrange the products and solutions according to your individual needs and build up the perfect IT-infrastructure for your business.
